

8 good reasons for...

COMPDISK™
quality without compromise.

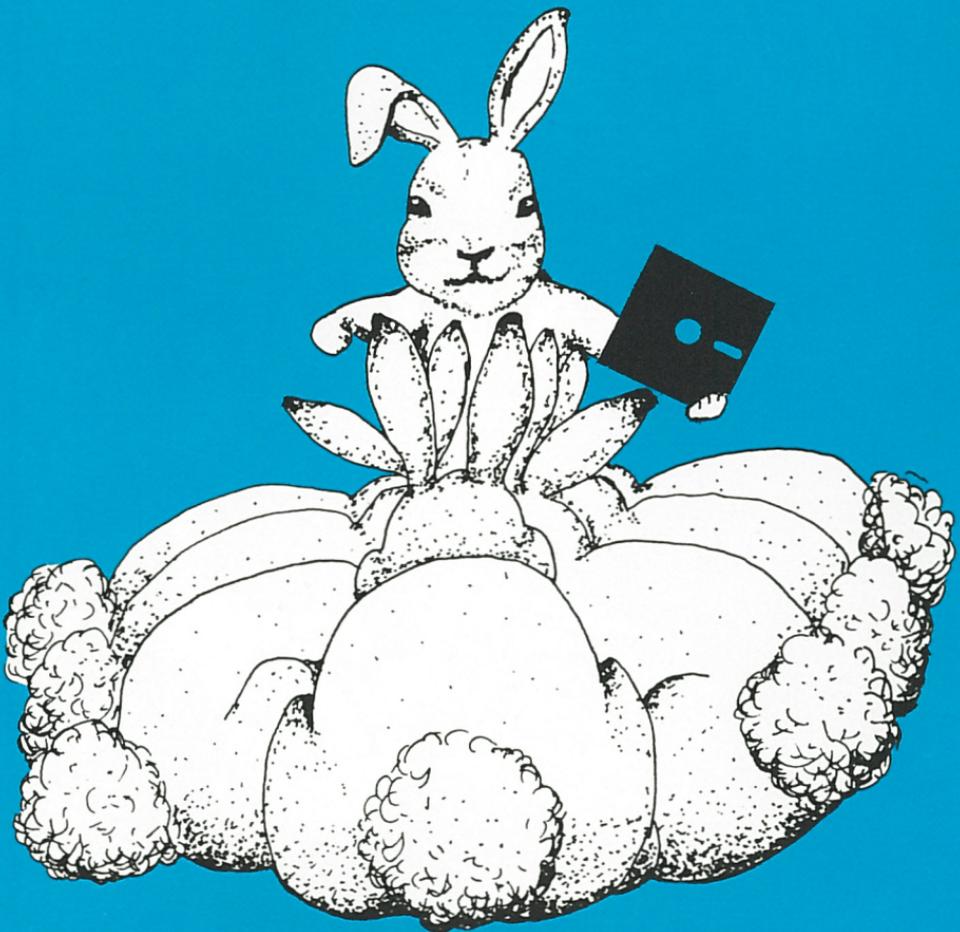

COMPDISK™ SOFTWARE DUPLICATION

COMPDISK™ is a high speed media duplicator of floppy disks; audio, data, and digital cassettes for use with today's micro computers. Format applications are extensive and include IBMpc, Commodore, Apple, Tandy TRS-80, and NEC. Our formatting logic coupled with our sources for engineering expertise enable us to support your operational requirements.

Our function is to duplicate media for you. Nineteen years of experience as high speed magnetic media duplicators enables us to:

- meet any parameter and specification
- provide service times to meet any schedule
- meet any operational requirements
- provide a product with quality assurance
- provide an acceptable non-failure rate
- provide duplicated diskette and cassette services which assures protection warranty
- provide total satisfaction

COMPDISK™ QUALITY—WITHOUT COMPROMISE

PHYSICAL SECURITY PROGRAM

COMPDISK™ provides complete physical security

- for your programs
- for your master disks
- for your content information and collateral materials through restricted area manufacturing
- confidential disclosure agreement
- bonded technical cadre and personnel

Total program security is one of the major benefits offered by COMPDISK™. Our duplication facility is enclosed and securely locked. Designed as a restricted area, access is provided only to those employees who are involved in the duplication process.

**COMPDISK™
SECURITY—WITHOUT COMPROMISE**

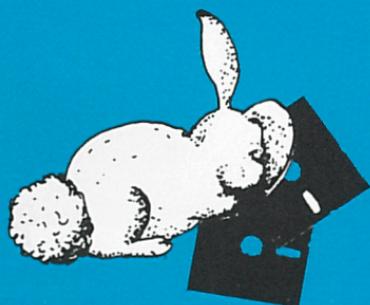

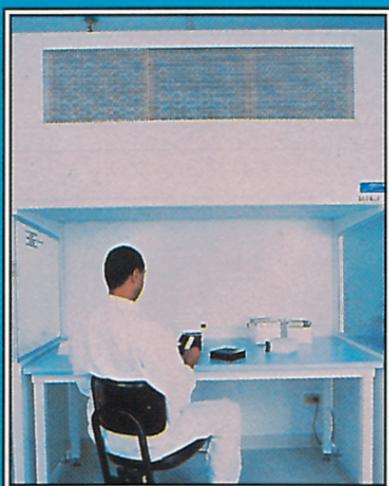

CLASS 100 CLEAN ROOM DUPLICATION

COMPDISK™ duplication work areas are clean rooms under laminar flow contamination control, with static electricity discharge containment, and supervised temperature and humidity control.

COMPDISK™ WITHOUT COMPROMISE

SKILLED PROFESSIONALS

Every COMPDISK™ employee is a highly trained, skilled and experienced professional dedicated to the task of producing and maintaining the flawless reproduction of your software program regardless of its media application.

COMPDISK™ PROFESSIONALS— WITHOUT COMPROMISE

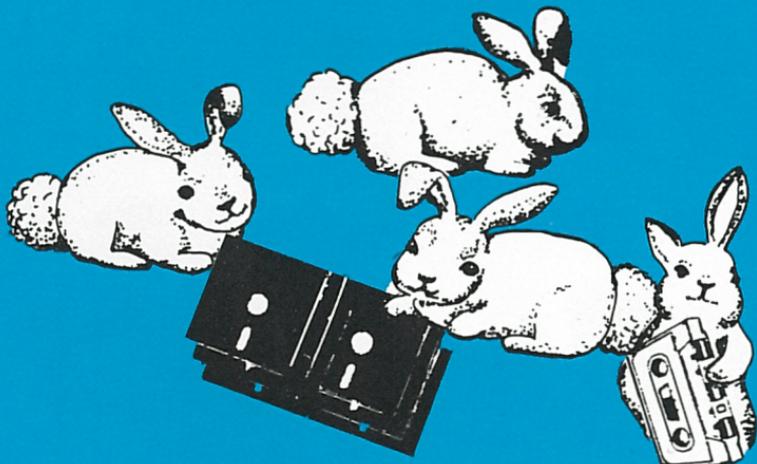

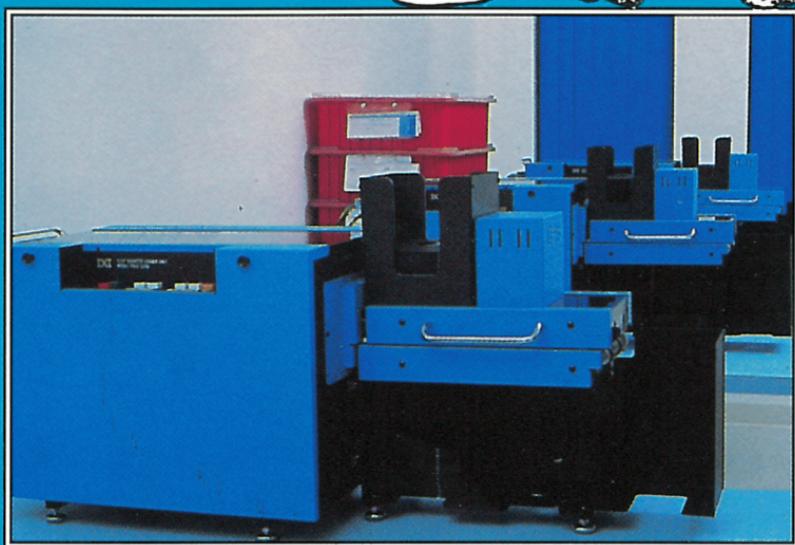

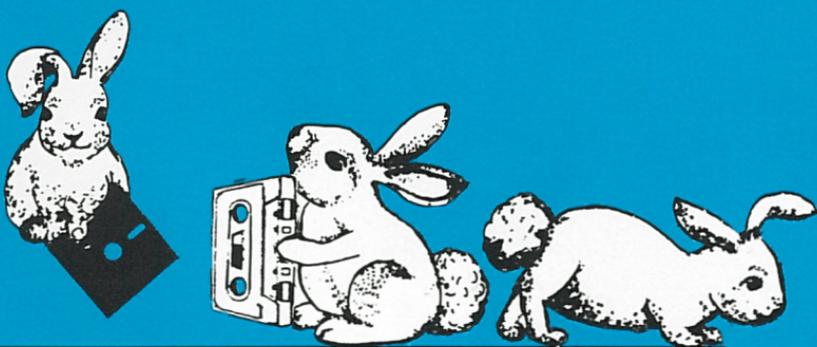

4

PRECISION ON-TRACK DUPLICATION

COMPDISK™ uses high quality error-free media and performs precision on-track duplication of software programs on automated proprietary equipment

Our product is completely guaranteed to meet or exceed industry standards.

COMPDISK™
PRECISION—WITHOUT COMPROMISE

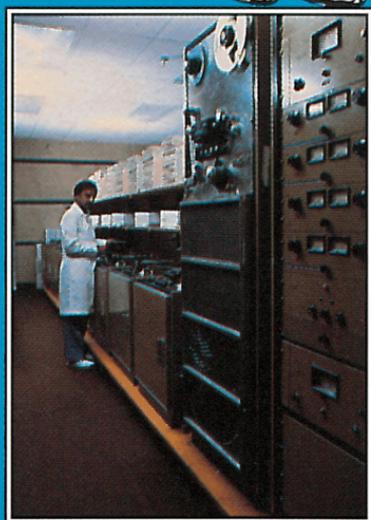

SOFTWARE PROTECTION ENGINEERING SUPPORT

Servicing industry, educational publishers and software producers with high speed, prime quality, media duplication since 1965, provides us with a unique working knowledge of various media, formats, control features and protection methods. This means the capability to understand and meet your needs for software support.

**COMPDISK™
EXPERTISE—WITHOUT COMPROMISE**

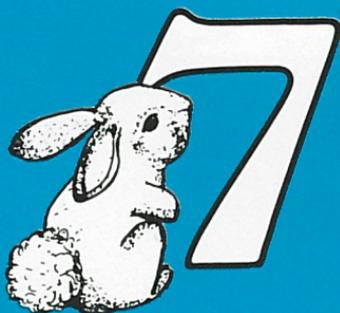

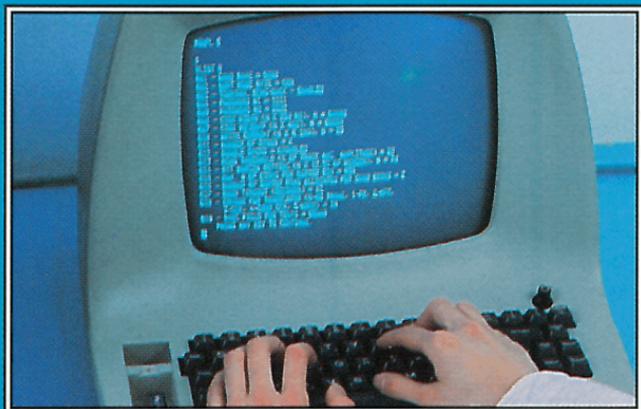

INBOUND MEDIA CONTROL

COMPDISK™ controls the recertification of all inbound media with testing equipment engineered to provide both on and between track testing of disk surfaces.

COMPDISK™ CONTROL—WITHOUT COMPROMISE

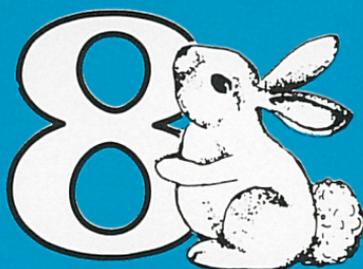

ENGINEERING AND MAINTENANCE SUPPORT

Our duplication production equipment is engineered and designed to maintain critical tolerances, during the duplication process. COMPDISK™ Engineering and Maintenance Staffs monitor all duplicating and testing equipment for optimum precision settings of critical parameters such as head alignment, spin speed, and azimuth, plus environmental conditions to assure maximum attention to faithful replication.

COMPDISK™ ATTENTION—WITHOUT COMPROMISE

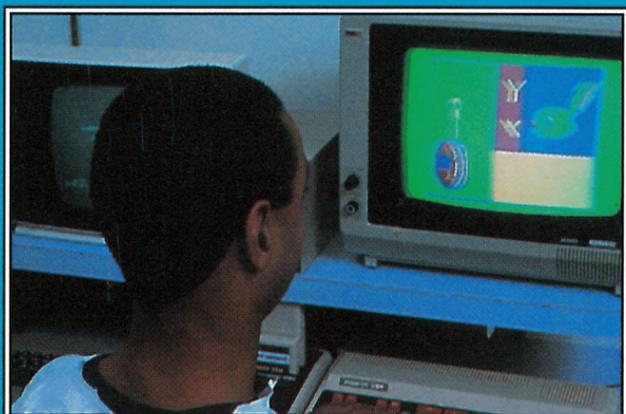

QUALITY CONTROL (AQL)

COMPDISK™ duplicates your software in disk or data cassette with flawless reproduction.

On-line duplicating equipment, quality control procedures are performed daily.

Verification of each duplicated product is automatically performed before, during, and after job completion. Before shipment, each order is reverified for duplication and configuration accuracy, assuring optimum performance under allowable system variances and environmental changes.
