

Dear Microcomputer Interest Group System Purchaser:

This letter is an audit to bring the club records up to date. It lists your purchases and amount paid, and also lists the parts that have been delivered to you. The parts lists for the power supply, mother board, and cabinet are on the back for your reference, as the items delivered will be referenced by number in the main part of this letter. Some of the parts have not been shipped yet, so you should not expect to have all of the parts, even though the full list is given.

Please carefully check the parts you have received against this list and return a copy of this letter to me indicating any discrepancies you may find. Please do this within two weeks so that I can update my records and correct any errors that I may have made. Failure to return the letter will be considered as full agreement with the audit, but please return the letter even if there are no problems. Your cooperation is greatly appreciated.

Thanks,  
Mike Beaver, Treas.
