SUBJECT: Survey of interest in Epson printer

There has been some interest in a group purchase of the Epson MX-80 printer. This printer is a dot matrix (9x9) impact. It comes with a parallel port and no graphics ROM. From what I have been able to find out the ROM will not be difficult to take care of for about ten extra dollars. The interfaces are more expensive depending on what you get. At this point I would like to find out if we will be buying enough printers to get the best discount. Please indicate on this form what you would be interested in if we were to buy this printer. This is a tracker feed, friction can be added for \$100.

Indicate QTY:	Best Prices	Retail
[ ] Base MX-80	\$420 to \$430	\$650
[ ] ROM	\$10 to \$50	95
[ ] HPIB IEEE 488	\$40 to \$80	?
[ ] RS 232	\$50 to \$95	?

If you would be interested in us looking at any other printer for group purchase, please comment below.

By the way, the employee purchase price on this printer with HPIB and the graphics ROM is \$477 plus tax or \$508. This price is going to be effective on March 1st. All of the prices above include tax because we would be buying them out of state. However, some shipping charges will be added.
