# Sun Storage Fibre Channel Switch Firmware Version 7.4.0.11.00 Release Notes

---

These release notes describe the known issues and release details that apply to Sun Storage Fibre Channel Switch firmware, version 7.4.0.11.00.

This document contains the following sections:

## Version

Users who intend to use the Enterprise Fabric Suite™ 2007 application for Sun FC switches and directors with firmware version 7.4 must use Enterprise Fabric Suite 2007 build 7.04.08 or later.

---

## Known Issues

The following table identifies the known issues in firmware version 7.4.0.11 and the QuickTools™ web applet for Sun FC switches and directors, version 7.04.08.

### Firmware

#### Sun CR 6724192

When upgrading firmware while in maintenance mode, the message "gpg: WARNING: This key is not certified with a trusted signature ..." is displayed. This message is incorrect and may be ignored.

#### Sun CR 6724198

While running port and/or switch diagnostics, the user should not replace SFP media. Doing so may result in the clearing of media information.

### QuickTools

#### Sun CR 6724200

QuickTools dialogs are modal (designed to stay on top of a parent window or pop to the top of a parent window when the parent window is selected.). On Solaris and Linux platforms, there is a known issue for the Java plug-in (bug #4739735) where the code to identify the parent frame doesn't work correctly. The dialog doesn't know who its parent is. The result is that all the dialogs act as if they were non-modal (they can come up or get behind their parent window and the parent is locked up by the dialog). This situation can occur when switching between other applications while using QuickTools or selecting the parent window while a child window is still open. If this occurs (a child window gets behind a parent window) the parent will appear non-responsive until the child window is closed. To resolve the situation use the Alt +Tab keys to change focus to the child window.

## Sun CR 6724202

When using the Firefox 2.0 browser with Solaris10 and opening and closing help windows from the dialog boxes, the following message may be displayed: "Firefox is already running but is not responding. To open a new window, you must first close the existing Firefox process or restart your system." If this occurs, you must follow the instructions to continue opening help windows.
