Date	June 13, 1980
Page 1 of	1

### Problem

When adding a name, a situation can arise where some information from the previously accessed record will be stored with the current record if no entry is made for a given field. This occurs most frequently in extended format in the remark line when the down arrow key, F2 or ENTER keys are pressed to skip it. The result is a default to whatever is currently in the file buffer and could be anything.

### Solution

The problem is corrected by following the steps listed below.

1. Backup the diskette(s) and make the changes on the Backup copy of the program.
2. In BASIC load the program by typing LOAD"MLS/BAS".
3. Make the following corrections:

CHANGES (Retype the line or refer to the Edit section of the owners manual)

This may be line 1600 or 1620 in older versions of the program.

Old Line: 1610 E0\$=SPACE\$(M1):E1\$SPACE\$(M1):E6\$=SPACE\$(M6):RETURN

New Line: 1610 E0\$=SPACE\$(M1):E1\$=SPACE\$(M1):E6\$=SPACE\$(M6):E2\$="":E3\$=""  
E4\$="":E5\$="":E7=0:E8\$="":RETURN

4. Type SAVE"MLS/BAS" to save the changes in the program.
5. At TRSDOS Ready, make a backup copy of the corrected diskette.
