ACRONYMS AND ABBREVIATIONS

A	account number 1
AMD	access method descriptor
AP	application program
ATP	access task processes
BNG	billing number group
BNR	billing number record
BOC	Bell operating company
BVA	billing validation application
CADB	customer authorization database
CB	current buffer
CCD	charge-coupled device
CFS	C-language version of LMOS file system
CP	central processor
CPU	central processing unit
DAG	directed acyclic graph
DANGL	directed acyclic node graph for locking
DBA	database administrator
DBAS	Database Administration System
DBCAT	database catalog
DBE	database editor
DBM	database manager
DBMS	Database Management System
DBS	database system process
DDL	data definition language
DDLP	data definition language processor
DFM	data format manager
DML	data manipulation language
DMLP	data manipulation language processor
E-R	entity-relationship
ESS	Electronic Switching System
FIFO	first in-first out
GRIT	general record interfacing technique
HDBMS	Hypergraph Database Management System
IAM	index access manager
IF	internal files
IM	interface module
IR	internal records
IS	intelligent store
LMOS	Loop Maintenance Operating System
LPAM	logical-address-to-physical-address map
LV	logical volumes
MAP	mapping function

NA	network address
pa	page address
PCDM	primary copy data manager
PDD	pending driver for disconnect orders
PN	pending node
RAM	record access manager
SA	service area
SCDB	secondary copy database
SCDM	secondary copy data manager
SDP	software demand paging
SSM	secondary storage management
TSN	transaction serial number
U	user
XFS	experimental system
